Assessment Requirements for FBPFV2001 Apply hydro-cooling processes to fresh produce

Release: 1

Assessment Requirements for FBPFV2001 Apply hydro-cooling processes to fresh produce

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- identified handling, hydro-cooling and storage requirements of produce
- set operating parameters to meet work requirements when applying a hydro-cooling process to fresh produce
- monitored temperature to ensure standards are maintained
- handled and transferred produce to maintain required conditions
- completed workplace documentation in required format
- applied food safety procedures
- identified non-conformances
- applied safe work practices and identified work health and safety hazards and controls.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- work health and safety hazards and controls, including the purpose and limitations of protective clothing and equipment
- hydro-cooling facilities and capacities available in the work area
- temperature control requirements of produce handled in the work area, including acceptable temperature ranges, consequences of failing to meet these ranges, and requirements for gradual temperature change
- handling procedures for receiving and locating produce including procedures for identifying, segregating and disposing of damaged or potentially unsafe stock
- stock handling procedures for transferring cooled stock from a temperature-controlled environment, including the maximum duration stock can be held outside a controlled environment

- food safety and quality consequences of stock temperature control requirements not being met
- monitoring procedures and instrumentation, including the use of thermometers or other temperature-measuring instrumentation
- notification, recording and reporting requirements and procedures for apply hydro-cooling processes
- operating procedures for goods handling equipment
- housekeeping requirements for work area.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - personal protective clothing and equipment
 - hydro-cooling specifications and facilities
 - produce requiring cooling
 - load-shifting equipment
- specifications:
 - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
 - stock information recording system and procedures
 - cleaning procedures, materials and equipment
- relationships:
 - interactions with team members and supervisors.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
