Assessment Requirements for FBPOPR2010 Work with temperature controlled stock

Release: 1

Assessment Requirements for FBPOPR2010 Work with temperature controlled stock

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has worked with temperature controlled stock on at least one occasion, including:

- accessing workplace information to determine stock handling and storage requirements
- identifying storage requirements, including temperature limits, minimum duration at given temperatures, and segregation and co-storage requirements
- identifying temperature controlled storage facilities and temperature zones available
- selecting, fitting and using PPE
- using materials handling equipment in a temperature controlled environment as required to undertake work functions
- following procedures to measure core and surface temperature of stock
- reading instrumentation
- identifying and reporting out-of-specification temperatures in stock and storage facilities
- taking corrective action in response to out-of-specification temperatures, including implementation of procedures to segregate damaged or potentially unsafe stock
- completing records of stock receipt and transfer as required
- maintaining work area to meet workplace cleaning standards
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- work health and safety hazards and controls, including the purpose and limitations of PPE
- temperature controlled storage facilities and capacities available in the work area

- temperature control requirements of stock handled in the work area, including acceptable temperature ranges and consequences of failing to meet these ranges and, where required, requirements for gradual temperature change
- stock handling procedures for receiving and locating stock within a store, including stock rotation and procedures for identifying, segregating and disposing of damaged or potentially unsafe stock
- stock handling procedures for transferring temperature controlled stock from a temperature controlled environment, including maximum duration stock can be held outside a controlled environment
- food safety and quality consequences of stock temperature control requirements not being met
- monitoring procedures and instrumentation, including use of thermometers or other temperature measuring instrumentation
- notification, recording and reporting requirements for temperature controlled stock
- operating procedures for goods handling equipment as required
- workplace cleaning standards for the work area
- recording requirements and procedures for working with temperature controlled stock.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - personal protective clothing and equipment
 - controlled temperature storage facilities
 - stock requiring storage
 - load shifting equipment as required
- specifications:
 - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
 - temperature storage specifications
 - stock information recording system and procedures
 - stock handling and rotation systems.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
