FBPOPR2027 Dispense non-bulk ingredients

Release: 1

FBPOPR2027 Dispense non-bulk ingredients

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Application

This unit of competency describes the skills and knowledge required to weigh, measure and label non-bulk ingredients to meet production requirements.

This unit applies to individuals who work under general supervision and exercise limited autonomy in a production environment within the food processing industry. It typically applies to the production worker responsible for the dispensing of ingredients in order to support production operations. Ingredients may be highly concentrated materials, including colours, flavours, buffered acids and preservatives.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work in processing area	1.1 Read or listen to work instructions from supervisor and clarify where needed 1.2 Identify work health and safety hazards and tell supervisor

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Wear appropriate personal protective equipment and ensure correct fit according to work health and safety requirements 1.4 Inspect materials to confirm type, quality clearance, and quantities, and identify any obvious contamination or non-compliance
2. Prepare to dispense ingredients	2.1 Select measuring and weighing equipment appropriate to dispensing requirements and confirm readiness for use 2.2 Confirm that containers, bags and labels are available according to job specifications 2.3 Carry out pre-start checks according to operator instructions
3. Measure and/or weigh ingredients	3.1 Weigh or measure non-bulk ingredients and additives according to food safety and job specifications 3.2 Label dispensed ingredients according to workplace procedures 3.3 Monitor the accuracy of measuring and dispensing equipment to identify variation in operating conditions 3.4 Report variations in equipment operation 3.5 Follow and apply workplace cleaning and environmental procedures
4. Complete the dispensing process	4.1 Clean dispensing equipment according to workplace procedures 4.2 Identify and report unacceptable equipment and utensil condition 4.3 Identify and report maintenance requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	- Interpret workplace and standard operating procedures relevant to job role - Interpret production requirements
Writing	Record operating, routine maintenance and shutdown information on paper-based and electronic media

Skill	Description
Numeracy	- Monitor and interpret production and process control indicators and data - Monitor supply and flow of materials to and from the process
Navigate the world of work	- Apply workplace procedures to own role and responsibilities - Identify skills, knowledge and experience required for performing own role in the workplace - Ask questions to clarify understanding or seek further information
Interact with others	- Communicate and report operational and safety information to relevant personnel - Use modes of communication suitable to purpose to confirm understanding when conducting operational start-up and shutdown procedures
Get the work done	- Access and interpret process control panels and system - Maintain a clean and hazard-free work area - Identify out-of-specification standards and maintain quality specifications - Confirm equipment status and condition - Interpret process and equipment information to monitor process and respond to abnormal performance and variations
