FBPOPR2042 Operate a drying process

Release: 1

FBPOPR2042 Operate a drying process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Application

This unit of competency describes the skills and knowledge required to set up, operate, adjust and shut down a drying process.

This unit applies to individuals who work under general supervision and exercise limited autonomy in a food processing environment. It typically applies to the production worker responsible for applying basic operating principles to the operation and monitoring of a drying process and associated equipment.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare the drying process for operation	1.1 Confirm availability of materials to meet operating requirements 1.2 Identify and confirm cleaning and maintenance requirements and status according to work health and safety and food safety requirements

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Enter processing and operating parameters as required to meet safety and production requirements 1.4 Check and adjust equipment performance as required to maintain specifications 1.5 Carry out pre-start checks according to work health and safety and operating procedures
2. Operate and monitor the drying process	2.1 Start, operate and monitor the process for variation in operating conditions 2.2 Monitor the process to confirm that specifications are met 2.3 Identify, rectify and report out-of-specification equipment, product or process outcomes according to workplace requirements 2.4 Follow and apply workplace housekeeping and environmental procedures
3. Shut down the drying process	3.1 Identify the appropriate shutdown procedure 3.2 Shut down the process according to work health and safety and operating procedures 3.3 Identify and report maintenance requirements according to workplace procedures 3.4 Maintain workplace records according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	- Interpret workplace and standard operating procedures relevant to job role - Interpret production requirements
Writing	Record operating, routine maintenance and shutdown information on paper-based and electronic media
Numeracy	Monitor and interpret production and process control indicators

Skill	Description
	- and data • Monitor supply and flow of materials to and from the process
Navigate the world of work	• Apply workplace procedures to own role and responsibilities • Identify skills, knowledge and experience required for performing own role in the workplace • Ask questions to clarify understanding or seek further information
Interact with others	• Communicate and report operational and safety information to relevant personnel • Use modes of communication suitable to purpose to confirm understanding when conducting operational start-up and shutdown procedures
Get the work done	• Access and interpret process control panels and system • Maintain a clean and hazard-free work area • Identify out-of-specification standards and maintain quality specifications • Confirm equipment status and condition • Interpret process and equipment information to monitor process and respond to abnormal performance and variations

Assessment Requirements for FBPOPR2042 Operate a drying process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated a drying process on at least one occasion, including:

- accessing workplace information to identify processing requirements
- selecting, fitting and using personal protective clothing and/or equipment
- confirming supply of necessary materials and services
- preparing materials as required
- conducting pre-start checks, including:
 - inspecting equipment condition, including checking belts, chains, screens, seals and valves, and filters, to identify any signs of wear
 - selecting appropriate settings and/or related parameters
 - cancelling isolation or lock-outs as required
 - confirming that equipment is clean and correctly configured for processing requirements
 - positioning sensors and controls correctly
 - ensuring any scheduled maintenance has been carried out
 - confirming that all safety guards are in place and operational
- starting, operating, monitoring and adjusting process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, including:
 - temperatures
 - moisture content
 - air flow
 - throughput
 - time/speed
 - pressure/vacuum
 - product characteristics

- monitoring supply and flow of materials to and from the process
- taking corrective action in response to out-of-specification results or non-compliance
- responding to and/or reporting equipment failure within level of responsibility
- reporting and/or recording corrective action as required
- locating emergency stop functions on equipment
- following isolation and lock-out/tag-out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- preparing equipment for cleaning
- completing workplace records as required
- maintaining work area to meet housekeeping standards
- using process control systems according to workplace procedures
- cleaning and sanitising equipment according to workplace procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the purpose and basic principles of the drying process, including the stages that occur during the drying process and the effect on product structure of each stage
- basic operating principles of equipment used in the drying process, including:
 - main equipment components
 - status and purpose of guards
 - equipment operating capacities and applications
 - the purpose and location of sensors and related feedback instrumentation
- services required to operate the drying process and action to take if services are not available
- quality characteristics to be achieved by the drying process
- materials preparation requirements and the effect of variation on the process
- the flow of the drying process and the effect of outputs on downstream processes
- operating requirements and parameters of the drying process, and corrective action required where operation is outside specified operating parameters
- typical equipment faults related to the operation of the drying process and related causes, including:
 - signs and symptoms of faulty equipment
 - early warning signs of potential problems
- methods used to monitor the drying process, including inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the process and related control measures

- common causes of variation, including air temperature, air velocity, humidity and pressure, and corrective actions required if these are out-of-specification
- work health and safety hazards and controls, including limitations of protective clothing and equipment relevant to the operation of the drying process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns, and procedures to follow in the event of a power outage
- isolation, lock-out and tag-out procedures and responsibilities required for the operation of the drying process
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the drying process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- cleaning and sanitation procedures required for the drying process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - personal protective clothing and equipment
 - drying process and related equipment and services
 - product to be dried
 - sampling schedules and test procedures and equipment as required
 - cleaning procedures, materials and equipment
- specifications:
 - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
 - information on equipment capacity and operating parameters
 - production schedule, batch instructions
 - specifications, control points and processing parameters
 - documentation and recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
