Assessment Requirements for FBPOPR2079 Work with temperature controlled stock

Release: 1

Assessment Requirements for FBOPR2079 Work with temperature controlled stock

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has worked with temperature controlled stock to correctly store at least one delivery of new stock, and rotate and monitor storage of existing stock, including:

- applying quality standards to work practices
- following safe work procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- work health and safety hazards and controls, including the purpose and limitations of personal protective equipment (PPE)
- temperature controlled storage facilities and capacities available in the work area
- temperature control requirements of stock handled in the work area, including acceptable temperature ranges and consequences of failing to meet these ranges, and, where required, requirements for gradual temperature change
- stock handling procedures for receiving and locating stock within a store, including stock rotation and procedures for identifying, segregating and disposing of damaged or potentially unsafe stock
- stock handling procedures for transferring temperature controlled stock from a temperature controlled environment, including maximum duration stock can be held outside a controlled environment
- contamination and cross-contamination risks and controls
- consequences to quality of product if stock temperature control requirements are not met
- monitoring procedures and instrumentation, including use of thermometers or other temperature measuring instrumentation
- notification, recording and reporting requirements for temperature controlled stock

- operating procedures for goods handling equipment as required
- safe work procedures for working with temperature controlled stock
- recording requirements for traceability.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - PPE
 - controlled temperature storage facilities
 - stock requiring storage
 - load shifting equipment as required
- specifications:
 - work procedures, including advice on safe work practices, quality and environmental requirements
 - temperature storage specifications
 - stock information recording system and procedures
 - stock handling and rotation systems.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
