Assessment Requirements for FSKNUM035

Use algebraic and graphical techniques to analyse mathematical problems for work

Release: 1

Assessment Requirements for FSKNUM035 Use algebraic and graphical techniques to analyse mathematical problems for work

Modification History

Release	Comments
Release 1	This version first released with FSK Foundation Skills Training Package Version 2.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- perform a broad range of multi-step mathematical problem solving processes using algebraic and graphical techniques to complete a workplace task, including at least two of the following:
 - solving linear equations using algebraic processes and graphical techniques
 - solving quadratic equations using the quadratic formula and factorising methods
 - solving simultaneous equations using algebraic and graphical solutions
- make estimations to check problem solving outcomes and determine appropriate accuracy required for above workplace task
- critically review above mathematical processes and outcomes obtained, and evaluate real-world implications.
-

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- range of methods to expand and factorise algebraic expressions and solve equations, including the application of the quadratic formula
- techniques to draw Cartesian graphs of relevant linear and non-linear equations
- key features of linear and non-linear equations and their graphs including the role of variables and constants
- real-life situations represented by parabolas, hyperbolas and exponential graphs
- real-life situations represented by relevant simultaneous equations
- purpose and use of relevant technology such as CAS calculator, spreadsheets or other mathematical or workplace software
- developed estimation and assessment processes
- implications of calculations and results for workplace tasks

- specialised and formal mathematical written language and symbolism relevant to workplace task.
-

Assessment Conditions

Competency is to be assessed in the workplace, a workplace simulated environment or a vocational training context.

Assistive technologies can be utilised to assist with oral and written communication.

Skills must be demonstrated independently using highly complex texts and tasks that reflect those typically found in a workplace.

The following resources are to be made available:

- a scientific calculator or graphing software
- own familiar support resources.

Assessors must:

- satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards, and
- have sound knowledge of the ACSF and performance features of the ACSF level being assessed, and
- have demonstrable expertise, knowledge and skills in the vocational contextualisation and assessment of the core skill, numeracy, and
- have completed the following or equivalent:
 - TAESS00009 Address Foundation Skills in Vocational Practice Skill Set; or
 - a higher level education qualification, such as:
 - TAE80113 Graduate Diploma of Adult Language, Literacy and Numeracy Practice (and its equivalent TAE70111); or
 - Bachelor of Education, Graduate Certificate or Graduate Diploma of Education, or higher. This may include qualifications relating to TESOL, adult education or vocational education.
