Assessment Requirements for FWPCOR2210 Follow workplace health and safety policies and procedures in forest and wood products operations

Modification History

Release	Comments
Release 1	This version released with Forest and Wood Products Training Package Version 7.0

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, for one work period/shift, the individual has complied with workplace health and safety requirements while performing personal work tasks related to a forest or wood products operation, including:

- identified and reported to supervisor health and safety hazards and associated risks that may be present in personal work setting
- selected and implemented appropriate risk controls
- used equipment and tools appropriate to the work activity to complete assigned tasks according to workplace procedures
- used and maintained personal protective equipment (PPE) and clothing to ensure personal safety
- followed safety signs and symbols
- completed one routine hazard, accident or incident report.

There must also be evidence that the individual has participated in at least one emergency and evacuation drill.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace standards, codes of practice, policies and procedures for workplace health and safety, as they apply to forest or wood products operations and the job role
- hazards and hazard identification, including associated risks and controls
- functional, operational and maintenance aspects of tools and equipment used in the individual's job role in the forest and wood products industry
- workplace procedures regarding use of PPE and clothing for own work activities

- fatigue management
- manual handling techniques
- procedures for recording and reporting workplace information.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest or wood products work environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - PPE relevant to work task
- specifications:
 - workplace health and safety policies and procedures relevant to the work activity
 - manufacturer instructions for the safe use of equipment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
