Assessment Requirements for FWPCOR4204 Monitor safety, health and environmental requirements in forest and wood products operations

Assessment Requirements for FWPCOR4204 Monitor safety, health and environmental requirements in forest and wood products operations

Modification History

Release	Comments
Release 1	This version released with Forest and Wood Products Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has monitored the implementation of safety, health and environmental (SHE) policies and procedures for one forestry or wood products operation to ensure compliance with legislative requirements, environmental management systems and workplace policies and procedures.

In performing this activity, the individual has reviewed and identified areas for improvement for at least three of the following, and made recommendations for improvements in relation to SHE compliance:

- organisation of duties, equipment and materials
- SHE hazards and associated risk in the work area
- documented workplace instructions and procedures
- SHE or incident reports
- emergency and evacuation procedures
- staff training and operational controls.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- applicable commonwealth, state or territory legislation, regulations, standards, codes of practice and established safe practices relevant to the full range of processes for monitoring SHE policies and procedures in forest or wood products organisations
- workplace standards, requirements, policies and procedures relevant to monitoring SHE policies and procedures in forest or wood products organisations
- monitoring SHE hazards and associated risks related to forest or wood products organisations:

- types and impact of SHE hazards and associated risks
- SHE hazard and associated risk identification
- ways of assessing and controlling hazards and associated risks
- processes for monitoring and assessing SHE hazards and associated risks
- processes for analysing work instructions, practices and procedures in relation to SHE risks and hazards
- monitoring emergency procedures in forest or wood products organisations:
 - workplace procedures for responding to emergency situations
 - reasons for monitoring emergency procedures
 - processes for monitoring emergency procedures
 - processes for conducting post-emergency reviews
- monitoring SHE procedures in forest or wood products organisations:
 - types and purpose of SHE procedures
 - processes for monitoring compliance with workplace SHE procedures
 - ways of integrating care for safety, health and the environment into all workplace procedures
- procedures for recording and reporting workplace information.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest or wood products work environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - forest or wood products work environment to enable monitoring of SHE practices
 - workplace SHE records
- specifications:
 - workplace health, safety and environment policy and procedures
 - workplace safety and environmental policies and procedures applicable to forest or wood products operations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
