Assessment Requirements for FWPCOR6202 Implement practices to maximise value from wood residues

Release: 1

Assessment Requirements for FWPCOR6202 Implement practices to maximise value from wood residues

Modification History

Release	Comment
1	Replaces equivalent unit FPICOR6202A Implement practices to maximise value from wood residues which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement'.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must be able to provide evidence that they can:

- Manage the development, implementation and evaluation process for one wood value maximisation plan.
- Produce a detailed written plan with clearly identified value maximisation practices.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- Purpose and key content and of legislation or regulation applicable to wood management practices.
- Key content of current government and industry initiatives, codes of practice and guidelines relevant to wood management practices.
- Different applications for wood and residue material, markets and general market value, including:
 - poles
 - piles and bridge timbers
 - veneer logs
 - saw logs
 - chip logs
 - charcoal logs
 - woody biomass
 - structural and non-structural timbers

- timber composites
- timber panel products
- timber engineered products
- eucalyptus oil
- extractives.
- Potential uses for wood residues and by products, markets and general market value
- Production practices that avoid or reduce wood residues.
- Role of wood or waste products in generating renewable energy through biomass.
- Types of authorisations, permits and licences relating to the following:
 - sites or properties
 - hours of operation
 - use and application of chemicals
 - environmental issues.
- Processes and practices for:
 - internal and external consultation
 - developing and implementing value maximisation plans
 - collecting and analysing relevant data
 - evaluating and modifying plans.
- Format, content and use of value maximisation plans.

Assessment Conditions

The following resources must be made available:

- Computers, keyboards, printers and software used to prepare budgets and document plans.
- Comprehensive information about the operation of a real or simulated business to determine value maximisation practices.
- Documents and proformas commonly used to plan, implement, review and improve value maximisation practices, including:
 - worksheets
 - budgets
 - policies and procedures
 - value maximisation plans.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- Hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and

- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.
