Assessment Requirements for FWPCOT2206 Stack and bind material

Release: 1

Assessment Requirements for FWPCOT2206 Stack and bind material

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has stacked and bound three different product packages, and has:

- built packs manually following workplace requirements for dimension, component numbers, end and vertical alignment and bearer quality
- built packs allowing adequate space for mechanical lifting and transporting
- identified standard size materials using visual assessment or measurement processes
- applied protective strips to packs
- applied wrapping to packs to prevent water penetration during storage and transportation
- strapped packs
- labelled packs ready for storage or transportation.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace policies and procedures relevant to stacking and binding material
- methods of visual estimation, grading, colour identification and tagging of materials:
 - sawn or dressed finished timber
 - differing timber species
 - preservative treated timber, including water borne preservatives and light organic solvent preservatives (LOSP)
 - panel products, laminated veneer, chipboard, fibreboard, medium density fibreboard and boards made from material other than wood
 - panels with various treatments, coatings and hardware items
- range of industry standard lengths, cross sections, appearance grades and applicable terminology

- operational and functional features of tools, equipment and plant:
 - plant used for mechanically lifting and transporting packs
 - equipment and tools used for binding materials
- workplace safety requirements relevant to stacking and binding material:
 - erecting signs and exclusion zones
 - safe work method statements (SWMS)
 - hazardous manual handling
 - plant and assistive lifting equipment
- processes and techniques of:
 - building, wrapping and strapping timber packs
 - communicating and reporting
 - recording and reporting production outcomes and equipment faults
 - labelling products for identification
 - selecting correct bearer dimension
- workplace and environmental requirements for disposing of waste.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a manufacturing or processing facility or timber yard or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - three different products to pack and bind
 - tools, mechanical lifting equipment and packing equipment to stack, bind and protect contents
- specifications:
 - access to workplace safety and environmental policies and procedures applicable to stacking and binding material
 - access to workplace procedures and forms for recording and labelling
 - access to work orders applicable to stacking and binding product packages.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
