products operations**

Assessment Requirements for FWPCOT2264 Follow quality and product care procedures in forest and wood products operations

Modification History

Release	Comments
Release 1	This version released with Forest and Wood Products Training Package Version 7.0

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, for one work period/shift, the individual has identified and followed workplace quality requirements while performing personal work tasks related to a forest or wood products operation.

In performing this activity, the individual has:

- confirmed quality requirements for the work task with supervisor
- inspected products processed during the work period/shift visually to ensure they meet product specifications and quality requirements
- identified and corrected quality problems or escalated issues to supervisor
- prepared quality and product care reports.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace quality and product care requirements and procedures in forest or wood products operations:
 - communicating product requirements and work output
 - product care and processing
 - identifying and resolving faults with product
 - minimising waste
 - recording and reporting workplace information
- forest or wood product specifications:
 - customer requirements
 - industry standard
 - enterprise standards

- environmental protection requirements related to forest or wood products operations:
 - identifying environmental risks and associated hazards
 - safely disposing of or recycling/re-using waste material as appropriate
 - minimising carbon emissions
 - minimising impact of the use of machinery and equipment on the environment
- mathematical procedures for estimating and measuring forest or wood product against specifications
- requirements of quality systems that may apply to product care and quality in forest or wood products operations
- assessing visual appearance of forest or wood products according to workplace procedures and nature of the product
- work health and safety policies and procedures relevant to forest or wood products operations:
 - personal protective equipment and clothing
 - safety equipment
 - first aid equipment
 - hazard identification and risk control
 - fatigue management
 - elimination of hazardous materials and substances
 - identifying hazards in the work process and assessing and controlling their risk
 - manual handling techniques.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest or wood products work environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - materials and equipment relevant to the work task being performed
- specifications:
 - workplace health, safety and environmental policies and procedures applicable to work task to be carried out
 - workplace quality requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
