Assessment Requirements for FWPCOT2271 Pack timber or wood products for despatch

Release: 1

Assessment Requirements for FWPCOT2271 Pack timber or wood products for despatch

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has planned and packed timber or wood products for:

- one routine order in readiness for despatch to customers
- one special order in readiness for despatch to customers.

In performing each of these tasks, the individual has:

- followed workplace health and safety and environmental protection practices and/or procedures for packing timber or wood products
- packed timber or wood products according to work order
- stacked, braced, strapped and labelled packs of timber or wood products
- used appropriate labelling methods
- modified packing of routine order
- monitored, reported and rectified packing faults and handling problems

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- safe work procedures involved in packing and handling timber or wood products, including the use of personal protective equipment
- workplace environmental protection requirements and practices, including the safe and efficient disposal, recycling or re-use of waste material, including bracing and strapping waste material
- workplace procedures related to timber or wood products packing process, including:
 - identifying and resolving common faults and problems

- recording and reporting workplace information
- end-use of timber or wood products to be packed, and consequences of product damage resulting from packing process
- characteristics of pack shift and movement, its impact on safety and how to control it
- packing sequences and weight distribution and their impact on safety and productivity
- packing methods that apply to different types of timber or wood products, including stacking, bracing, and strapping
- tools and equipment used for packing, and procedures for their safe use and maintenance.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a timber processing plant, a timber manufacturing plant or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - timber or wood products to be packed
 - materials and equipment used to pack products
 - packing materials
 - labelling materials
 - personal protective equipment required for packing operations
- specifications:
 - work order or instruction detailing task to be carried out
 - workplace health and safety and environmental protection policies and/or procedures applicable to timber or wood products packing operations
 - workplace procedures for timber or wood products packing operations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
