Assessment Requirements for FWPCOT3228 Plane/sand panels

Release: 1

Assessment Requirements for FWPCOT3228 Plane/sand panels

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3228B Plane/sand panels, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational policies and procedures relevant to planing and sanding panels
- plane and sand panels in readiness for application to panel products or for interim storage
- redistribute material on site using designated equipment
- conduct operator maintenance on planing and sanding equipment

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- planning or sanding techniques
- methods of visual inspection
- characteristics of timber and veneer
- typical flow of material supply in and out of the planing and sanding area
- typical work flow processes and sanding techniques for optimising thickness, finish and quality of timber and veneer panels
- typical timber and veneer defects and how they affect ability to produce quality finished product:
 - warp
 - wane
 - cupping
 - shakes

- insect defects
- knots
- resin pockets
- lifting veneer
- bonding problems
- key features of, and applicable terminology for, industry standard grades for re-classifying quality and use of planed and sanded timber and veneer panels
- purpose, features and operation of equipment used to plane and sand panels:
 - panel planers or thicknessers
 - surface planers or buzzers
 - drum sanders
 - panel sanders
 - veneer sanders
 - stroke sanders
 - dust extraction equipment:
- machine specific dust extraction systems with collection bags
- hopper-based extraction systems
- methods for assessing condition of planer blades and sanding belts
- organisational policies and procedures specific to planing and sanding panels:
 - workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
 - communication reporting lines
 - recording and reporting production outcomes, equipment faults and maintenance requirements
- environmental protection practices for forest products factory settings:
 - reducing water and energy use
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing timber and other waste

Assessment Conditions

The following resources must be made available:

- planing equipment
- sanders including one or more of the following:
 - drum sanders
 - panel sanders
 - veneer sanders
 - stroke sanders
- dust extraction equipment
- maintenance tools and equipment for planers and sanders
- consumable planer blades and sanding belts

- personal protective equipment suitable for planing and sanding panels
- commercial panels
- manufacturers' instructions for use and maintenance of equipment
- work order with specific instructions for planing and sanding panels
- template documents for recording production outcomes, equipment faults and maintenance requirements
- organisational policies and procedures for planing and sanding panels.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.
