FWPCOT3228 Plane/sand panels

Release: 1

FWPCOT3228 Plane/sand panels

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3228B Plane/sand panels, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to plane and sand the the surfaces of panels, optimising board thickness or retaining integrity of veneers. Work is complete in a forest products factory setting and includes operator maintenance.

The unit applies to Timber Products Technician, Production Worker.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical

Elements and Performance Criteria

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>
1. Prepare for planing and sanding	1.1 Review work order and where required check with appropriate personnel. 1.2 Select appropriate personal protective and other equipment and check for operational effectiveness. 1.3 Obtain type and quantity of panels for planing or sanding from the production process.

	1.4 Plan planing or sanding process in line with work order.
2. Plane and sand panels	2.1 Use equipment in line with organisational safety procedures, manufacturer's instructions and environmental protection practices. 2.2 Complete pre start-up checks and set planing or sanding thickness and feed rate for optimal product recovery. 2.3 Position material and feed at rate appropriate to machine speed, capacity, board or veneer panel thickness and condition. 2.4 Plane or sand panels to specification and assess panel visually throughout process for thickness, finish quality and veneer faults. 2.5 Coordinate outfeed to ensure efficient recovery of planed or sanded material. 2.6 Check dust extraction equipment regularly and clean to avoid blockages.
3. Redistribute material	3.1 Grade finished panels for quality and use in line with industry standards. 3.2 Direct material to storage or processing operations in line with organisational procedures. 3.3 Dispose of sub-standard material in line with environmental protection practices. 3.4 Clean work area in line with organisational safety procedures.
4. Complete operator maintenance	4.1 Follow organisational safety procedures to lock out equipment. 4.2 Check planer blades or sanding belts for bluntness or damage. 4.3 Remove and replace planer blades or sanding belts in line with manufacturer's recommendations. 4.4 Keep machine area clear of dust and debris in line with organisational safety procedures. 4.5 Record and report production outcomes, equipment faults and maintenance requirements to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

Numeracy skills to:	- identify quantities of required material within work orders and count numbers of panels - interpret order sizes and set up equipment to achieve correct
---------------------	--

	- dimensions and grades - calculate the feed rate to optimise quality and quantity of production output.
Oral communication skills to:	ask open and closed probe questions and actively listen to clarify contents of work orders.
Reading skills to:	- interpret: - workplace health and safety and other organisational procedures - work orders - manufacturers' instructions and maintenance recommendations.
Writing skills to:	complete accurate basic records for production outcomes, equipment faults and maintenance requirements.
Planning and organising skills to:	efficiently and logically sequence the stages of preparation and production using work order to guide activities.

Range of Conditions

Not Applicable
