Assessment Requirements for FWPCOT3323 Assess wood materials visually

Release: 1

Assessment Requirements for FWPCOT3323 Assess wood materials visually

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- assessed visually two different wood materials used in a forest or wood products operation against industry standards
- identified any defects and imperfections of the assessed wood material
- labelled and transferred assessed wood material to a storage facility or for further processing according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- industry standards and codes of practice related to the visual assessment of wood materials
- environmental protection requirements relevant to forest or wood products operations:
 - safe disposal of waste material
 - recycling and reuse of substandard materials
- workplace standards, policies and procedures relevant to visually assessing wood materials
- methods of visual estimation and assessment of wood materials
- typical wood material defects and characteristics
- treatment of wood materials for defects
- distribution processes for assessed wood materials
- storage systems and labelling used in forest or wood products operations
- types, safe use and maintenance of tools and equipment used for visually assessing wood materials
- procedures for recording and reporting workplace information.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest or wood products work environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - wood materials for visual assessment
 - equipment and tools used in visual assessment of wood materials
- specifications:
 - workplace health, safety and environmental policies and procedures applicable to work task to be carried out
 - workplace quality requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
