Assessment Requirements for FWPCOT3327 Contribute to energy efficiency in the forest and wood products industry

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- applied two different energy efficient work practices in performing routine work tasks related to forest or wood products operations
- participated in one workplace review of energy use and made one suggestion for improving energy efficiency in the workplace.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace standards, requirements, policies and procedures on energy efficiency that are applicable to forest or wood products operations
- environmental protection requirements related to forest or wood products operations, including the safe disposal of waste material and workplace recycling, recovery and waste management procedures
- workplace communication channels, protocols and procedures used in forest or wood products operations
- life cycle analysis of forest and wood products
- benefits of forest and wood products compared to other materials in terms of energy efficiency
- strategies for communicating the benefits of wood products over other materials to internal and external clients.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest and wood products industry workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - industry literature on energy use, energy efficiency and energy efficient work practices
- specifications:
 - workplace environmental policies and procedures applicable to energy use and efficiency in the workplace
 - workplace procedures on energy use and energy efficient work practices.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
