Assessment Requirements for FWPCOT3341 Coordinate and monitor wood chip stockpile

Release: 1

Assessment Requirements for FWPCOT3341 Coordinate and monitor wood chip stockpile

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- planned wood chip stockpile operations for one production period at one site
- established and controlled the wood chip stockpile during one production period at the site
- coordinated and monitored the loading, movement and distribution of wood chips to, from and over the wood chip stockpile during one production period at the site.

In performing these tasks, the individual has:

- followed workplace procedures
- safely used, and directed others to safely use, chip slinging equipment
- maintained wood chip stockpile to ensure stability, compactness and access for chip retrieval and ongoing slinging
- safely directed others when chips are delivered and transported by wheeled or tracked dozers or loaders
- maintained schedules to ensure that sufficient quantities of chips are available to meet demand
- maintained accurate records about stockpile and movement of woodchips.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and safe use of equipment used in coordinating and monitoring the wood chip stockpile including:
 - wheeled dozers and loaders
 - chip slinging equipment

- wood chip movement and loading procedures
- environmental protection requirements and practices for maintenance and safe disposal of waste material from stockpiles, and the cleaning of plant, tools and equipment
- environmental hazards and associated risks with stockpiles, including contamination
- workplace procedures relating to the wood chip stockpile
- causes and consequences of stockpile self-heating and fire
- wood chip movement and loading procedures
- workplace health and safety procedures including procedures for fire, emergency and evacuation
- procedures for recording and reporting workplace information
- maintenance procedures for tools and equipment.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a timber processing plant, wood chip processing plant or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - wood chip stockpile
 - equipment used in wood chip stockpile operations, including chip slinging equipment, wheeled or tracked dozers or loaders
 - personal protective equipment suitable for coordinating and monitoring the wood chip stockpile
- specifications:
 - workplace procedures for planning, coordinating and monitoring a wood chip stockpile
 - workplace health and safety and environmental protection policies and/or procedures applicable to planning, coordinating and monitoring a wood chip stockpile
- relationships:
 - team members and relevant personnel for the purposes of communicating information.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
