Assessment Requirements for FWPHAR3202 Monitor log recovery (rigging slinger)

Release: 1

Assessment Requirements for FWPHAR3202 Monitor log recovery (rigging slinger)

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- planned and performed rigging slinger operations on four turns following workplace policies and procedures and related industry codes of practice for log recovery operations
- assisted in shifting lines according to hook tender instructions.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- content and application of applicable state or territory code of practice relevant to log recovery activities
- key features of varying site conditions, hazards and their effects on log recovery
- environmental protection practices for forest and plantation operations:
 - safe disposal of waste material
 - cleaning of plant, tools and equipment
- characteristics of trees that affect rigging slinger operations in a harvesting environment
- industry standard lengths for logs
- techniques used by rigging slingers in the log recovery process
- key features of varying signal systems used for log recovery activities:
 - tooter signals
 - two-way radio
 - visual signals
- purpose, features and operation of cable logging system components, including:
 - rigging components
 - cable systems

- workplace procedures specific to log recovery activities:
 - workplace health and safety, with particular emphasis on use of personal protective equipment (PPE), safe manual handling and fire prevention measures
 - communication reporting lines
 - reporting breakout safety and equipment faults.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a working cable logging operation
- resources, equipment and materials:
 - active cable logging system
 - PPE required in cable logging operations
- specifications:
 - access to workplace safety and environmental protection policies and procedures applicable to log recovery and cable logging activities
 - access to site emergency procedure
 - access to workplace standard operating procedures or operator manual for cable logging equipment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
