Assessment Requirements for FWPSAW3229 Operate a portable sawmill

Release: 1

Assessment Requirements for FWPSAW3229 Operate a portable sawmill

Modification History

Release	Comment
1	Replaces equivalent unit FPISAW3229B Operate a portable saw, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational policies and procedures relevant to operating a portable sawmill
- safely operate a portable sawmill to produce green boards to meet a work order
- assess logs for suitability for sawing
- use cant hooks, winches, log rollers and mechanical lifting equipment to position logs for sawing and ensure that logs are stable
- correctly position the carriage to support the saw and the log
- assess blades for replacement and conduct operator maintenance on portable sawmill machinery.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- organisational policies and procedures for operating a portable sawmill
- features and safe use of portable sawmills and other equipment including:
 - cant hooks
 - winches
 - log rollers
 - mechanical lifting equipment
- prestart up checks for portable sawmills including:

- ensuring that the saw has been set-up correctly
- ensuring that the blades are installed accurately
- ensuring that the machinery is operating to optimum performance
- optimisation of log sawing including:
 - planning the cutting of a log to achieve the most from it (the most and widest boards possible)
 - ensuring environmental requirements are central to this planning process
- the characteristics of logs for sawing, which must include:
 - diameter range
 - curvature
 - faults
 - species
 - moisture content
- break down processes, feed rates and finish
- blade condition assessment
- log defects which includes:
 - defects arising from a change in moisture content
 - warp
 - wane
 - curvature
 - shakes
 - insect defects
 - knots and resin pockets
 - sweep
 - taper
 - end splits
 - shape
- environmental protection requirements for the safe disposal of waste material, and the cleaning of plant, tools and equipment
- procedures for recording and reporting workplace information.

Assessment Conditions

The following resources must be made available:

- logs for sawing
- portable sawmill
- personal protective equipment
- work order
- relevant personnel for the purposes of communicating information
- documents, spreadsheets and commonly used proforma documents
- organisational policies and procedures relevant to operating a portable sawmill

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
 - be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence
