FWPSS00078 Introduction to Timber Systems Design - Technical Application Skill Set

Release: 1

FWPSS00078 Introduction to Timber Systems Design - Technical Application Skill Set

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Release 9.1.

Description

This skill set covers the skills and knowledge required to interpret plans, create sketches and perform basic calculations in a timber system design environment for building construction.

Pathways Information

These units of competency provide credit towards qualifications in the *FWP Forest and Wood Products Training Package*, including:

- *FWP31220 Certificate III in Timber Systems Design*

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- CPCCOM1015 Carry out measurements and calculations
- CPPCMN4008 Read plans, drawings, and specifications for residential buildings
- FWPCOT3303 Prepare sketches and drawings
- FWPCOT3304 Take off material quantities

Target Group

This skill set is for individuals who are responsible for the preparation, calculation, costings, interpretation of plans and drawings at an entry level in the forest and wood products industry.

Suggested words for Statement of Attainment

These competencies from the *FWP Forest and Wood Products Training Package* meet the industry requirements for carrying out basic timber systems design in a timber production or design environment.
