Assessment Requirements for FWPWPP2206 Prepare veneer for ply

Release: 1

Assessment Requirements for FWPWPP2206 Prepare veneer for ply

Modification History

Release	Comment
1	Replaces equivalent FPIWPP2206B Prepare veneer for ply, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- complete production jobs to bond sheets of veneer in line with individual work orders for each job that prescribe:
 - varying thickness of sheets of veneer to be used
 - varying numbers of layers of veneer to be bonded
 - varying quantities of assembled ply to be produced
- for each of the above jobs, visually inspect assembled ply and grade according to industry and organisational standards.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- environmental protection practices for forest products factory settings:
 - reducing water and energy use
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing timber
 - disposing of hazardous substances
- typical flow of material supply in and out of the veneer production area
- typical work flow processes and techniques used to bond sheets of veneer
- purpose, features and operation of ply assembly tables and glue spreading stations

- appropriate parameters for rate of glue feed, spread and tack levels and effects of weather conditions on glue properties
- methods used to safely store glue
- key features of and applicable terminology for industry standard grades for assembled ply
- organisational procedures specific to preparing veneer for ply:
 - workplace health and safety with particular emphasis on equipment lock out, use of personal protective equipment and handling hazardous substances
 - communication reporting lines
 - recording and reporting production outcomes, equipment faults and maintenance requirements.

Assessment Conditions

The following resources must be made available:

- ply assembly tables with glue spreading stations
- personal protective equipment suitable for preparing veneer for ply
- a diverse range of commercial single thickness veneer of varying thicknesses
- glue mix
- manufacturers':
 - instructions for equipment use
 - safety data sheets for glue
- work order with specific instructions for preparing veneer for ply
- template documents for recording production outcomes and equipment faults
- relevant personnel for the purposes of communicating information
- organisational procedures for preparing veneer for ply.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.
