HLT37026 Certificate III in Sterilisation Services

Release: 1

HLT37026 Certificate III in Sterilisation Services

Modification History

Release	Comments
1	This qualification was first released in HLT Health Release 11.0.

Qualification Description

This qualification reflects the job role of those responsible for the reprocessing of reusable medical devices and other devices in a reprocessing environment within a health or non-health facility. Individuals in the role are required to follow organisational procedures and relevant industry standards and guidelines. This role plays an integral part of infection prevention and control, following validated procedures and maintaining quality processes throughout each stage of the reprocessing cycle.

Tasks are carried out under general supervision and individuals are accountable for their own work using a combination of technical and communication skills to complete routine duties and address common operational issues within their scope.

The role contributes to safe outcomes by maintaining accurate documentation, adhering to traceability requirements and complying with the quality and safety frameworks within a reprocessing environment.

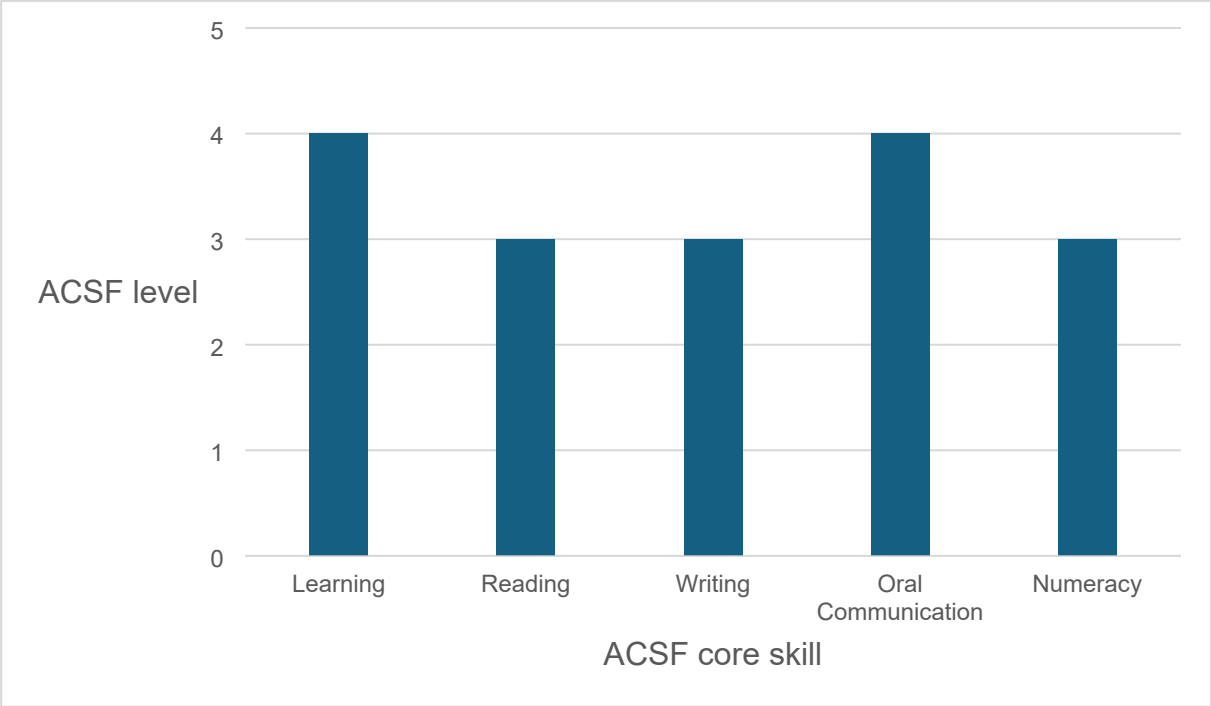

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Foundation Skills Outcomes

The foundation skills outcomes in this qualification are outlined below.

© Commonwealth of Australia, 2026 HumanAbility
