Assessment Requirements for HLTAHA022

Prepare infant formulas

Release: 1

Assessment Requirements for HLT AHA022 Prepare infant formulas

Modification History

Release	Comments
Release 1	This version was released in <i>HLT Health Training Package release 2.0</i> and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Removal of pre-requisite. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has (under the direction of a dietitian):

- made up 3 infant formulas according to prescribed recipe and using precise measurement as per referral, 1 in a simulated environment and 2 in the workplace
- performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of work

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- the importance of:
 - accurate formula preparation and need for the correct formula
 - aseptic conditions
- different infant formulas and their use, including but not limited to:
 - elemental
 - semi-elemental
 - polymeric specialist
- organisation policy and procedures in relation to:
 - infection control and food safety program as they relate to assisting with meals, menus and dietary guidelines

- other specific organisation policies or procedures, including supervisory and reporting protocols
- legal and ethical considerations relevant to allied health:
 - privacy, confidentiality and disclosure
 - work health and safety:
 - manual handling including identification and control of manual task risk factors

Assessment Conditions

All aspects of the performance evidence must have been demonstrated using simulation prior to being demonstrated in the workplace under direction and supervision (direct, indirect, remote) as determined by the dietitian.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - recipes and equipment for the preparation of infant formulas
 - food safety standards and procedures
 - manufacturers' manuals and recommendations for equipment
 - food safety program

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.
