Assessment Requirements for HLTAMB001 Follow procedures for routine safe removal of patient

Release: 1

Assessment Requirements for HLTAMB001 Follow procedures for routine safe removal of patient

Modification History

Release	Comments
Release 1	This version was released in <i>HLT Health Training Package release 3.0</i> and meets the requirements of the 2012 Standards for Training Packages. Supersedes HLTAMBAE403D Follow procedures for routine safe removal of client. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed 2 routine extrications of a patient including:
 - analysing and making decisions that ensured patient welfare
 - conducting risk assessment and identifying hazards
 - applying the correct and safe lifting and manual handling techniques
 - using available resources and various types of appropriate equipment
- used interpersonal skills while working with other workers and patient during safe egress.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- workplace health and safety (WHS) policies and procedures relevant to the movement of patients
- patient care requirements under a range of circumstances involving movement of patient
- correct use of relevant equipment
- potential for adaptation of available resources
- factors that may affect safety and welfare of patient and crew.

Assessment Conditions

Skills and knowledge must be demonstrated in a workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.
