Assessment Requirements for HLTDEF004 Attend to emergency patients being transported by road

Release: 1

Assessment Requirements for HLTDEF004 Attend to emergency patients being transported by road

Modification History

Release	Comments
Release 1	This version was released in <i>HLT Health Training Package release 2.0</i> and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- developed and documented at least 1 transport/movement plan that includes:
 - logistical requirements, including relevant points of contact
 - clinical requirements
- transported a patient by road in at least 2 different situations in accordance with state/territory regulations and organisation policies and procedures:
 - used safe manual handling techniques
 - used ancillary equipment
- used effective communication during the transport process:
 - used communication equipment and systems
 - communicated with vehicle driver
 - communicated with health professionals using appropriate medical terminology
- adapted approaches to clinical tasks to the emergency transport context

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal, ethical and military requirements for emergency transport:

- codes of practice
- duty of care
- infection prevention and control
- informed consent
- mandatory reporting
- privacy, confidentiality and disclosure
- records management and documentation
- rights and responsibilities of workers, employers and patients
- work role boundaries – responsibilities and limitations
- work health and safety, manual handling safety for self, patients and equipment
- organisation policies and procedures for patient transport
- methods of loading and unloading patients under life-threatening conditions
- types of movement that exacerbate clinical conditions
- patient care and restraint during transportation
- configuration of the road transport vehicle being used for carriage
- operation of communications equipment (radio/2 way)
- features of AS/NZS 4535:1999 ambulance restraint systems that apply to patient transport from an individual worker's perspective

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - a road transport vehicle suitable for patient transport
 - casualties (high fidelity simulation, resuscitation mannequins and/or actors). Note: 1 transport assessment must include an actual person (not a mannequin) and can be conducted in a simulated role
 - documentation used within the emergency environment
 - in service stretchers
- modelling of industry operating conditions, including:
 - a minimum of 2 people in the transport team (1 driver and the designated carer)
 - a minimum of 1-2 other personnel supporting the transport process

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors. In addition, assessors must have at least 3 years' experience as a health professional in an acute care/emergency/pre-hospital department setting.
