Assessment Requirements for HLTENN012 Implement and monitor care for a person with chronic health problems

Release: 2

Assessment Requirements for HLTENN012 Implement and monitor care for a person with chronic health problems

Modification History

Release	Comments
Release 2	This version was released in <i>HLT Health Training Package release 4.1</i>. Updated Knowledge Evidence to remove references to resources which are now obsolete.
Release 1	This version was released in <i>HLT Health Training Package release 3.0</i> and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Supersedes HLTEN513B

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken nursing work in accordance with Nursing and Midwifery Board of Australia professional practice standards, codes and guidelines
- analysed health information and the clinical presentation of 1 person in the workplace or simulated environment to reach an accurate conclusion on possible nursing interventions related to their chronic health problems, in consultation with a registered nurse
- performed nursing interventions in the workplace to contribute to the support of 2 people who have chronic health problems.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- broad context for chronic disease:
 - World Health Organisation (WHO) and other models of chronic disease

- national health priorities for chronic disease
- continuum of chronic disease
- life variables that have an impact on health and well-being
- impacts of chronic disease:
 - social
 - emotional
 - physical
 - psychological
 - financial
- rehabilitation strategies, techniques and equipment used for chronic health conditions including:
 - physiotherapy
 - occupational therapy
 - hydrotherapy
 - Pilates
 - massage
 - art and music therapy
 - use of wheelchairs, scooters and walking aids
 - use of prosthetics
- clinical manifestations of chronic disease or chronic health conditions including:
 - common sites for cancer development
 - chronic asthma
 - chronic obstructive pulmonary disease
 - chronic pain including back pain
 - chronic renal failure
 - congestive heart failure
 - diabetes
 - eczema
 - incontinence
 - motor neurone disease
 - neurological injury
 - long-term unconsciousness
 - osteoarthritis
 - permanent and temporary tracheostomies
 - Parkinson's disease
 - rheumatoid arthritis
 - stroke
 - systemic lupus erythematosus (SLE)
- strategies to address and manage chronic disease in the relevant work context:
 - prevention

- use of various treatments
- principles of and practices for person-focused nursing practice
- maintenance of positive life roles
- enabling change of a person's behaviour over time
- stages of change, to establish readiness for attitudinal and behavioural change
- palliative care.

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources in accordance with the Australian Nursing and Midwifery Accreditation Council's Standards including:
 - assessment data
 - progressive notes of a de-identified person's medical history
 - organisation policy and procedures on which the candidate bases the planning
- modelling of industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold current registration as a Registered Nurse with the Nursing and Midwifery Board of Australia.
