Assessment Requirements for HLTFSE008 Conduct internal food safety audits

Release: 1

Assessment Requirements for HLT FSE008 Conduct internal food safety audits

Modification History

Release	Comments
Release 1	This version was released in <i>HLT Health Training Package release 3.0</i> and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Removed prerequisite. Supersedes HLTF312D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- planned, conducted and documented at least 2 food safety audits to meet audit scope, legal and organisational requirements of food business.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- relevant sections of the food standards codes, legislation, industry guidelines and food processes relevant to health and community services sectors and necessary to verify food safety compliance
- purpose, scope and stages of the internal food safety audit
- legal and organisational requirements and processes for:
 - internal and external second or third-party audits
 - internal and external audit roles, responsibilities and legal liabilities
 - prescribed fees, levies and charges
 - appropriate ethical conduct of auditors
 - certification and/or registration of auditors and authorised officers

- food safety and the purpose and intent of current legislation
- reporting findings of the audit, conflict of interest, confidentiality, rights of appeal and giving evidence in court
- reporting non-conformities that present an imminent and serious risk to the safety of food
- business classification and scope and frequency of audit
- training and assessment requirements for food safety workers and supervisors
- minimum standards of design and construction required of food premises, fixtures, fittings, equipment and transport vehicles as required by food safety legislation and relevant Australian Standards
- audit procedures and techniques:
 - recording and reporting requirements
 - business systems and related reference documents and appropriate application of these in an audit
 - data analysis methods
 - techniques for collecting information, including choice of appropriate methods to ensure data is adequate and representative
- food safety program procedures and requirements
- food safety hazards and associated risks
- where food business control methods or limits vary from industry standards or where there are no industry standards, technical knowledge required to assess data used by the business to validate acceptable limits
- hazard analysis and critical control points (HACCP) procedures, including:
 - techniques for identifying hazards that may be reasonably expected to occur
 - determining appropriate control methods
 - monitoring and record keeping
 - validating and corrective action requirements.

Assessment Conditions

Skills must have been demonstrated in a workplace or a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities equipment and resources, including a real food business within the health or community services sectors where food safety hazards are identified and controlled by a food safety program
- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

- In addition, the person assessing this unit of competency must be a competent and approved food safety auditor, as defined by food safety legislation.
