Assessment Requirements for HLTPHA005 Conduct small scale compounding and labelling of pharmaceutical products

Release: 1

Assessment Requirements for HLTPHA005 Conduct small scale compounding and labelling of pharmaceutical products

Modification History

Release	Comments
Release 1	This version was released in <i>HLT Health Training Package release 2.0</i> and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Significant changes to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed workplace procedures and industry codes to correctly and safely compound and label at least 5 different batches of pharmaceutical products listed in the *Australian pharmaceutical formulary and handbook* (APF)
- identified issues outside scope of own practice and referred to the authorised person

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical requirements (national, state/territory) for pharmacy work, and how these are applied in organisations, including:
 - codes of conduct
 - duty of care (and implications of negligence)
 - privacy, confidentiality and disclosure
 - records management
 - rights and responsibilities of workers, employers and clients
 - specific legislation:
 - medicines and their use
 - the practice of pharmacy

- different schedules of medicines and pharmaceutical products
- work role boundaries – responsibilities and limitations in manufacturing products
- work health and safety
- key information in standard pharmaceutical references and their use in manufacturing, including:
 - APF
 - MIMs
 - *Australian medicines handbook (AMH)*
 - Micromedex
- rationale for, and key features of:
 - The Society of Hospital Pharmacists (SHPA) *Guidelines for medicines prepared in Australian hospital pharmacy departments*
 - Pharmaceutical Inspection Convention and Pharmaceutical Inspection Co-operation Scheme (PIC/S) *Guide to good practices for the preparation of medicinal products in healthcare establishments*
- product identification and handling, including those for:
 - formulary medicines and non-formulary medicines
 - products with the required integrity as well as those whose integrity has been compromised
 - routine of handling products and products requiring special handling
- nature and use of different dosage forms including:
 - oral
 - parenteral products
 - topical
- infection control requirements for small scale compounding of pharmaceutical products, including:
 - correct disposal of sharps and residues
 - cleaning and disinfection processes
 - personal hygiene
 - sources and types of contamination and required responses (microbial, cross-chemical, physical, environmental; and corrective strategies)
- manufacturing processes relating to small scale compounding, including:
 - nature and use of oral and topical dosage forms
 - chemical and physical properties of raw materials in relation to formulation and compounding
 - types of equipment, their key features and use
 - compounding of a product according to a work sheet
 - principles and procedures of formulae calculations, weights and measures
 - processes for dilution, suspension, incorporation and reconstitution
- risk considerations and procedures for pharmaceutical manufacturing:
 - product security

- handling and storage of hazardous materials
- quarantine periods
- requirements for formulated manufacturing documentation
 - different documentation types, their scope and purpose
 - worksheet processes
 - information quality requirements including clarity, logic and completeness
- labelling requirements for compounded products, including:
 - adherence to legislative requirements
 - name, form and strength of product
 - ancillary labels as part of label details
 - hazard warnings
 - spacing for entry of batch numbers and expiry dates
- packaging methods, container materials and principles for selection
- storage and transport requirements and rationale for different types of product including:
 - hazardous materials
 - special storage considerations:
 - humidity
 - isolation
 - light
 - temperature
 - ventilation
- features and use of pharmacy systems used for small scale compounding

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - weighing and measuring equipment
 - utensils
 - raw materials
 - pharmaceutical references
- modelling of industry operating conditions, including presence of time constraints for activities

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.
