Assessment Requirements for HLTPOP012 Contribute to testing of results of community water supply

Release: 1

Assessment Requirements for HLTPOP012 Contribute to testing of results of community water supply

Modification History

Release	Comments
Release 1	This version was released in <i>HLT Health Training Package release 3.0</i> and meets the requirements of the 2012 Standards for Training Packages. Title change. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP319C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- provided assistance in testing the quality of 2 water supply samples, including:
 - following workplace health and safety (WHS) and personal protective equipment requirements
 - reporting and following up findings
- identified at least 2 potential water supply contaminants and followed correct procedures to address and follow up concern.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and organisation requirements relating to monitoring the quality and safety of water supply to the community, including:
 - national, State/Territory and local health policies, goals, targets and priorities
 - processes used by key people and outside agencies to sample and treat water supply in the community and/or outstations

- organisation standards, policies and procedures, including WHS and requirements for personal protective equipment
- roles and responsibilities of self, key people and agencies
- points of contact to assist with the implementation of strategies which are outside own area of responsibility
- sources of water in the community and how the community accesses its water supply
- environmental health issues in relation to water supply
- water uses and quality guidelines
- water sampling techniques and treatment and disinfection processes
- how to interpret water testing results
- the signs and indicators of possible contaminants
- strategies to maintain water quality.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - WHS procedures
 - personal protective equipment
 - organisation guidelines and procedures
 - sampling and testing work area, equipment and materials
 - water supply samples
- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.
