Assessment Requirements for HLTPOP023 Build capacity to promote health

Release: 1

Assessment Requirements for HLTPOP023 Build capacity to promote health

Modification History

Release	Comments
Release 1	This version was released in <i>HLT Health Services Training Package release 3.0</i> and meets the requirements of the 2012 Standards for Training Packages. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP505C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- developed, implemented, monitored and evaluated at least 3 separate strategies to build the capacity to promote health at each of the following levels:
 - individual
 - team
 - organisation.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- roles and responsibilities of relevant agencies, legal and organisational considerations relating to developed, implemented, monitored and evaluated strategies, including:
 - equity issues in population health
 - evidence-based practice
 - social change and advocacy processes
 - relevant international charters and/or declarations and documents

- national, State/Territory and local health policies, goals, targets and priorities
- organisation standards, policies and procedures, including scope of own role and responsibilities
- theory of capacity building and examples of current strategies
- dimensions of capacity building:
 - development of infrastructure
 - enhancement of program sustainability
 - fostering problem solving capabilities
- principles of effective capacity building practice, including:
 - respecting and valuing pre-existing capacities
 - developing mutual trust
 - being responsive to context within which capacity building program sits
 - avoiding pre-packaged ideas and strategies
- key action areas of capacity building, including:
 - organisational development
 - workforce development
 - resource allocation
 - partnerships
 - leadership
- examples of pre-existing capacities, including:
 - skills
 - structures
 - partnerships
 - resources.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.
