ICPSUP2160 Inspect quality against required standards in a production environment

Release: 1

ICPSUP2160 Inspect quality against required standards in a production environment

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to inspect the quality of print work against job specifications during the production process.

It applies to individuals who perform a range of mainly routine tasks, using limited practical skills and fundamental knowledge in a defined context. They generally work under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify job quality requirements	1.1 Confirm job with client and identify job specifications according to enterprise procedures 1.2 Identify quality requirements and tolerances, and inspection and testing procedures 1.3 Confirm quality specifications with client
2. Inspect quality during job	2.1 Apply inspection and testing procedures at regular intervals to determine conformity with job specifications and to minimise waste 2.2 Take corrective action to rectify problems as required according to enterprise procedures and within scope of own role 2.3 Escalate quality concerns to required personnel according to

ELEMENT	PERFORMANCE CRITERIA
	enterprise procedures
3. Finalise job	3.1 Confirm output meets job quality requirements 3.2 Complete required documentation according to enterprise procedures 3.2 Document and escalate process improvement suggestions according to enterprise procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	Interprets text in job specifications and written instructions
Initiative and Enterprise	Selects from a small range of communication modes, forms and channels to meet a specific purpose within the immediate work environment
Self-management	- Determines priorities and sequences steps involved in clearly defined, familiar tasks and identifies and assembles required resources - Takes responsibility for routine low-impact decisions in familiar situations - Identifies and implements standard solutions for an increasing number of routine problems

Unit Mapping Information

Supersedes and is equivalent to ICPSUP216 Inspect quality against required standards.

Assessment Requirements for ICPSUP2160 Inspect quality against required standards in a production environment

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 4.0.

Performance Evidence

- The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of the unit, including evidence of the ability to:
- complete a job quality record for at least five jobs with each job record including:
 - quality inspections carried out
 - suggestions for improvements escalated to required personnel
 - complaints or reports of faulty goods or documentation received from customers (internal or external) relating to work handled by the individual and issues resolution undertaken in these instances.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- principles of the quality inspection system
- quality requirements for job commencement, including:
 - quality standards set by the customer
 - areas that need to be inspected for quality
- enterprise quality procedures relating to print production jobs in performance evidence, including:
 - timing of quality inspections
 - control instruments used in quality inspections
 - rectification of identified faults
 - quality specification to be recorded on the job sheet
- personnel responsible for product quality.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the work area.

This includes access to:

- a production environment as required to demonstrate the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
