Assessment Requirements for ICTCBL309 Construct aerial cable supports

Release: 1

Assessment Requirements for ICTCBL309 Construct aerial cable supports

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- prepare site for aerial cable support construction, ensuring all relevant authorities have been notified and approvals obtained prior to commencement
- install aerial support structures using pole and wall supports, applying all related health and safety requirements and work practices
- use rigging procedures, methods and equipment for working safely at heights
- restore site and complete documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the Australian Communications and Media Authority (ACMA) regulation requirements for Telecommunications Cabling Provider Rules as they apply to aerial cabling
- recognise the features and operating requirements of cable supports and installation equipment
- outline the legislation, codes of practice and other formal agreements that impact on aerial cable supports
- outline the requirements for safe operation of equipment
- describe the safety precautions required when working at heights
- specify other health and safety requirements relating to the activity and site conditions
- identify typical issues and challenges that occur on the work site.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – cabling field of work and include access to:

- sites where construction of aerial cable supports may be conducted
- aerial support installation equipment currently used in industry
- relevant regulatory and equipment documentation that impacts on aerial cable installation activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
