Assessment Requirements for ICTCBL335 Construct aerial cable supports

Release: 1

Assessment Requirements for ICTCBL335 Construct aerial cable supports

Modification History

Release	Comments
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate, on two occasions, the ability to perform the tasks outlined in the elements, performance criteria and foundation skills, and to:

- prepare site for aerial cable support construction, ensuring all relevant authorities have been notified and approvals obtained prior to commencement
- install aerial support structures using pole and wall supports, applying all related health and safety requirements and work practices and manufacturer requirements

Note: Evidence must be provided at least once when a specific volume or frequency is not stated.

Knowledge Evidence

The candidate must demonstrate the knowledge required to perform the tasks outlined in the elements, performance criteria and foundation skills, which includes knowledge about:

- relevant legislation, regulations, codes, and standards and other formal agreements that impact on aerial cable supports, in particular:
 - Australian Communications and Media Authority (ACMA) regulatory requirements for Telecommunications Cabling Provider Rules as they apply to aerial cabling
- features and operating requirements of cable supports and installation equipment and authorisations
- requirements for safe operation of equipment
- safety precautions required when working at heights and on pole infrastructure
- other health and safety and environmental requirements relating to the activity, equipment types and site conditions
- typical worksite issues and challenges.

Assessment Conditions

Skills must be assessed in a workplace or simulated environment where conditions are typical of those in a telecommunications work environment or workplace.

Access is required to:

- site/s where construction of aerial cable supports can be conducted
- aerial support installation equipment currently used in industry
- relevant regulatory and equipment documentation that impacts on aerial cable installation activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. Refer also to the *Requirements for assessors* in the ICT Information and Communications Technology Training Package Companion Volume Implementation Guide.
