Assessment Requirements for ICTCBL403 Supervise cabling project

Release: 1

Assessment Requirements for ICTCBL403 Supervise cabling project

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- complete all appropriate plans and financial budgets for cabling activities
- supervise cabling project applying human resource policies, including awards and conditions and all related health and safety and work practices
- monitor and implement alternate plans where necessary to meet work schedules and client requirements
- complete a project report on a cabling project detailing recommendations for improvement.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe appropriate methods for scheduling, costing and managing labour and resources on a project
- recognise the requirements to safely operate equipment and install components according to a manufacturer's specification
- outline the health and safety standards and practices required to:
 - manage risk and hazards in the workplace
 - use health and safety standards
 - work systematically with required attention to detail without injury to self or others
- identify and describe legislation, codes of practice and other formal agreements that impact on the work activity
- identify typical issues and challenges that occur in scheduling and supervising a worksite
- outline the components of reports and identify the reasons for other documentation required when supervising a project.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – cabling field of work and include access to:

- a site with a cabling project
- human resource policies, including awards, conditions and all related work health and safety (WHS) and work practices
- relevant regulatory and equipment documentation that impacts on monitoring activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
