Assessment Requirements for ICTDMT406 Produce and edit digital images

Release: 1

Assessment Requirements for ICTDMT406 Produce and edit digital images

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- identify, edit and sequence at least three digitally captured images using each of the following types of image capturing devices on at least one occasion, including:
 - mobile phone devices
 - smart devices
 - digital SLR.

In the course of the above, the candidate must:

- demonstrate the operation of a digital camera in order to capture a range of images
- assemble required tools and procedures required to produce digital images
- demonstrate using digital imaging software to prepare high quality digital images that satisfy a range of customer and business requirements
- apply copyright and IP requirements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- functions and features of a range of delivery platforms
- digital photographic techniques
- principles of communication through visual design
- implications of technology connectivity
- work health and safety (WHS) requirements for use of cameras, and computers, and handling and disposing of lithium batteries
- procedures for customer and business liaison
- copyright and intellectual property legislation, policies and procedures

- industry standards relevant to digital images.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- special purpose tools and equipment
- materials and industry software packages
- image capturing equipment including:
 - digital camera
 - mobile phone device with image capturing capacity
 - smart device with image capturing capacity
 - digital SLR
- industry standard graphics software
- copyright information.
