Assessment Requirements for ICTICT206

Install software applications

Release: 1

Assessment Requirements for ICTICT206 Install software applications

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- install software applications through operating system instructions
- configure computer to accept new software or upgrade
- carry out testing and acceptance according to organisational guidelines.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe a typical client business domain
- identify typical hardware storage devices
- identify typical input and output devices
- describe key licensing arrangements and responsibilities to ensure they are adhered to
- identify operating systems supported by the organisation
- describe the organisational guidelines for purchasing
- identify the installation requirements for key software application packages
- describe typical software copyright responsibilities.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- a personal computer (PC) where software installation may be performed
- application software currently used in industry

- documents detailing organisational testing and acceptance policy and procedures.

Assessors must satisfy NVR/AQTF assessor requirements.
