Assessment Requirements for ICTICT506 Implement process re-engineering strategies

Release: 1

Assessment Requirements for ICTICT506 Implement process re-engineering strategies

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop and document a re-engineering process that supports organisational objectives
- take into consideration the complex interdependencies between organisational and external drivers
- implement a re-engineering process
- monitor and analyse the impact of the process in the organisation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss business case preparation process and how it can be applied to developing organisational strategies
- identify and summarise relevant laws and standards as they apply to process re-engineering strategies, including:
 - benchmarks
 - copyright
 - intellectual property
 - ethics
 - cultural and political diversity
- outline the impact that new processes may have on an organisation
- outline procedures relating to consulting internally and externally.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- a process re-engineering plan
- analysis software
- e-business models
- modelling software
- an organisational strategy
- an organisational structure and culture
- a personal computer (PC)
- stakeholder analysis.

Assessors must satisfy NVR/AQTF assessor requirements.
