Assessment Requirements for ICTICT523 Gather data to identify business requirements

Release: 1

Assessment Requirements for ICTICT523 Gather data to identify business requirements

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- identify sources and gather information pertinent to the business requirements
- review and analyse business requirements based on business strategy and current and future directions
- confirm the business-critical factors with stakeholders
- prepare data and document data analysis for review according to organisational standards.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- features of client business domain that inform project team and client understanding of business needs
- industry accepted hardware and software products, general features and capabilities considerations when determining business functions
- role of stakeholders and degree of their involvement in the process
- quality assurance practices required when determining business requirements.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- project brief
- business documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
