Assessment Requirements for ICTPMG602 Manage ICT project initiation

Release: 1

Assessment Requirements for ICTPMG602 Manage ICT project initiation

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- produce a comprehensive business case information and communications technology (ICT) project implementation approach that takes into account core technology limitations and project constraints
- establish and work in a cohesive project team.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the characteristics of leadership and technical teams
- describe the consultation and communication techniques, styles and strategies, including interviewing techniques required when managing a project
- describe estimation and cost analysis techniques
- explain the process of establishing technical teams and determining stages of team development
- describe the process of setting objectives and conducting a benefits analysis
- identify the organisational values, policies and processes that are applicable to the project
- describe performance management and project team appraisal methods
- identify and describe the processes for monitoring team and own performance
- explain cash flow and how it is managed through budgeting
- describe a range of project management methods and tools, and how they apply in a formal project management methodology
- explain the proposed systems analysis and modelling techniques
- summarise the process of determining team roles, and describe the delegation process within a multi-project methodology context

- explain the proposed technology solution models and frameworks.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the ICT project management field of work and include access to:

- industry software packages
- an organisation's identified problem, opportunity or unfulfilled legislative need.

Assessors must satisfy NVR/AQTF assessor requirements.
