Assessment Requirements for ICTPMG803 Undertake a telecommunications project

Release: 1

Assessment Requirements for ICTPMG803 Undertake a telecommunications project

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- research and critically analyse the deliverables for a telecommunications project
- consult with relevant personnel to elicit and confirm project outcomes
- prepare plans for implementation, address contingencies and manage risk
- implement and monitor telecommunications project work and report progress to relevant personnel
- ensure project is completed in accordance with environmental and client requirements
- document the project outcomes and obtain client sign off.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- evaluate organisational project management policies and procedures in relation to project development
- critically analyse the operation of transmitters and receivers
- explore the management of safety on projects and setting project policies and procedures for:
 - personal protective equipment conforming to industry and work health and safety (WHS) standards
 - precautions required to minimise, control or eliminate hazards that may exist during work activities
- evaluate the impact of relevant legislation, codes, regulations and standards on the project
- explore the telecommunications system principles and operational procedures that contribute to project development, including:

- personnel involved
- project specifications
- project resources
- evaluate the workplace and industry environment and its impact on development of the project.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – project management field of work and include access to:

- a telecommunications operations site on which a project can be carried out
- computers and relevant computer software
- relevant legislation, codes, regulations and standards.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
