Assessment Requirements for ICTSAD401 Develop and present feasibility reports

Release: 1

Assessment Requirements for ICTSAD401 Develop and present feasibility reports

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify and confirm services required
- document the project scope
- develop solutions to client's requirements that fit within the constraints
- document the feasibility report according to requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the client business domain
- outline the system's current functionality
- explain the role of stakeholders and the degree of stakeholder involvement
- describe and compare TWO or more current industry systems development methodologies.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems analysis and design field of work, and include access to:

- client requirements
- report writing template
- client expectations brief

- information on a range of information and communications technology (ICT) business solutions
- future organisational business processes
- budgets for scenarios
- outcomes of the business analysis process.

Assessors must satisfy NVR/AQTF assessor requirements.
