Assessment Requirements for ICTSAD604 Manage and communicate ICT solutions

Release: 1

Assessment Requirements for ICTSAD604 Manage and communicate ICT solutions

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- establish processes to:
 - trace requirements
 - control and track changes to requirements
 - scope solutions
- manage requirement relationships
- package and communicate requirements according to what is appropriate for a project or stakeholder group.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain conflict resolution and issue management techniques to handle possible changes to solution scope
- outline requirements management and traceability processes
- list and apply techniques for managing version control and configuration.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems analysis and design field of work, and include access to:

- a simulated or workplace project in a medium-to-large enterprise
- observation of the candidate carrying out business analysis work

- reports and plans prepared for the projects
- a portfolio of the project work to be undertaken.

Assessors must satisfy NVR/AQTF assessor requirements.
