Assessment Requirements for ICTSAD605 Elicit ICT requirements

Release: 1

Assessment Requirements for ICTSAD605 Elicit ICT requirements

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- construct and implement requirements for elicitation activities
- select and apply elicitation techniques that are appropriate to the situation
- document requirements and obtain stakeholder sign-off.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain conflict resolution and issue management techniques
- provide an overview of negotiation and consensus strategies
- summarise techniques to elicit and manage the gathering of requirements
- formulate risk management strategies with regard to requirements gathering, staff management and proposed systems
- outline scope management and change control processes
- describe version control and configuration management approaches.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems analysis and design field of work, and include access to:

- appropriate policies
- current business analysis tools
- appropriate legislation

- reports and plans prepared for the projects
- a portfolio of the project work to be undertaken.

Assessors must satisfy NVR/AQTF assessor requirements.
