Assessment Requirements for ICTSAS525 Develop and conduct client acceptance tests

Release: 1

Assessment Requirements for ICTSAS525 Develop and conduct client acceptance tests

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop a test plan based on system requirements and acceptance criteria, undertake functional testing, and document outcomes and processes on at least one occasion.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key features and processes of industry standard automated testing tools
- key aspects of organisational rules and standards
- organisational and user requirements
- industry standard testing methodologies used in acceptance testing.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- business requirements and organisation's deliverables
- project documentation, including:
 - templates
 - standards
 - specifications
 - client user and technical manuals
 - test plan
- technical components of system, including:

- software
- hardware
- network
- industry standard system application required for testing
- functional test cases that satisfy required acceptance criteria.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
