Release 1

ICTSS00102 Cyber Incident Threat Detection and Prevention Skill Set

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Description

This skill set addresses the skills and knowledge required to run vulnerability assessments, interpret information for threats and develop incident response plans to maintain cyber security.

Pathways Information

The units provide credit towards ICT40120 Certificate IV in Information Technology and other qualifications that allow for selection of these units.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTCYS404 Run vulnerability test assessments for an organisation
ICTCYS405 Develop cyber security incident response plans
ICTCYS407 Gather, analyse and interpret threat data

Target Group

This skill set is for network penetration testers, information and technology security consultants, and network and security consultants who work in business environments.

Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Package meet industry requirements for cyber security threat detection and prevention in ICT contexts.
