Release 1

ICTSS00131 Introduction to Assistive Technologies Skill Set

Modification History

Release	Comments
Release 1	This version first released with the Information and Communications Technology Training Package Version 8.0. Newly created to equip learners with skills across in-demand technologies.

Description

This skill set addresses the skills and knowledge required to identify, implement, evaluate and improve assistive technologies and related components to enhance organisational capabilities that support inclusion and accessibility for all stakeholders, including persons with disabilities.

Pathways Information

The units provide credit towards ICT40120 Certificate IV in Information Technology and other qualifications that allow for selection of these units.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTICT452 Support the implementation of assistive technologies

ICTICT453 Evaluate accessibility of organisational systems, programs and software

ICTICT454 Assess organisational systems using assistive technologies

Target Group

This skill set is for individuals who work in a range of roles across all industries, including inclusion officers, disability access officers, and other related roles responsible for improving organisational inclusion and accessibility capabilities across learning, working and operational functions for persons with disabilities.

Suggested words for Statement of Attainment

These units of competency from the ICT Information and Communications Technology Training Package meet industry requirements for evaluating and enabling organisational inclusion and accessibility through supporting the advancement of assistive technologies in workplace contexts.
