Release 1

ICTSS00141 Core Technical IT Skills for Intermediate Roles Skill Set

Modification History

Release	Comments
Release 1	This version first released with the Information and Communications Technology Training Package Version 8.0. Newly created to serve as a stackable skill set that builds towards attaining <i>ICT50220 Diploma of Information Technology</i>. The units in this skill set comprise some of the core units of <i>ICT50220 Diploma in Information Technology</i>.

Description

This skill set addresses the core technical skills and knowledge required to develop and apply concepts to maintain security, privacy and ethics in intermediate roles across a range of workplace environments.

Pathways Information

The units provide credit towards ICT50220 Diploma in Information Technology and other qualifications that allow for selection of these units. The units in this skill set comprise some of the core technical units of ICT50220 Diploma in Information Technology. Users are advised to consult the skill set pathways section of the current version of ICT Companion Volume Implementation Guide to confirm the currency of this information and for further guidance.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

BSBCRT512 Originate and develop concepts

BSBXCS402 Promote workplace cyber security awareness and best practices

ICTICT532 Apply IP, ethics and privacy policies in ICT environments

Target Group

This skill set is for individuals who work in technical support roles, including network administrators, digital media technicians, and other related intermediate roles, who are responsible for independently producing concepts to maintain and promote security, privacy and ethics across information and communications technology (ICT) systems and components.

Suggested words for Statement of Attainment

These units of competency from the BSB Business Services and ICT Information and Communications Technology Training Packages meet industry requirements for a range of intermediate roles that maintain security, privacy and ethics to create secure digital environments in workplace contexts.
