ICTSS00185 Basic ICT Sustainability Skill Set

Release 1

ICTSS00185 Basic ICT Sustainability Skill Set

Modification History

Release	Comments
Release 1	This version first released with the Information and Communications Technology Training Package Version 8.0. Supersedes and is not equivalent to ICTSS00061 Basic ICT Sustainability Skill Set.

Description

This skill set addresses the skills and knowledge required to use energy conservation technologies for the safe and sustainable maintenance of basic ICT networks.

Pathways Information

This skill set provides credit towards ICT40120 Certificate IV in Information Technology, ICT41219 Certificate IV in Telecommunications Engineering Technology, and other qualifications that allow for selection of these units.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTSUS402 Install and test power saving hardware

ICTSUS403 Install and test power management software

Target Group

This skill set is for individuals who work in telecommunication roles, including network technicians, and other related roles, who are responsible for deploying and testing technologies that reduce energy consumption in workplace environments.

Suggested words for Statement of Attainment

These units of competency from the ICT Information and Communications Technology Training Package meet competency requirements for basic sustainable maintenance of energy conservation technologies.
