Assessment Requirements for MARF025 Respond to marina emergencies

Release: 1

Assessment Requirements for MARF025 Respond to marina emergencies

Modification History

Release 1. This is the first release of this unit of competency in the MAR Maritime Training Package Release 3.0.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- applying evacuation procedures
- applying precautions and required action to minimise, control or eliminate hazards that may exist when responding to an emergency or incident
- applying relevant work health and safety (WHS)/occupational health and safety (OHS) requirements and safe work practices
- communicating effectively with others when responding to an emergency or incident
- completing documentation related to an emergency or incident response
- operating safety equipment correctly and adapting to any differences
- reporting and/or rectifying identified problems, faults or malfunctions promptly, according to with workplace policies and procedures
- reading, interpreting and recording instructions, procedures and information
- reporting an emergency accurately and according to operating procedures
- selecting and using required personal protective equipment
- working collaboratively with others when responding to an emergency or incident.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- duty of care
- emergency procedures manual and evacuation plan
- emergency response plan, its contents and purpose
- firefighting techniques and systems
- relevant regulatory requirements applicable to emergency or incident
- role and responsibility of a marina fire warden and first aid officer safety considerations
- site layout and building construction
- types of emergencies
- typical problems that can occur during an emergency or incident and action that can be taken
- vessel types and construction relevant to marina emergencies
- WHS/OHS requirements and work practices.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in a fully operational marina or, where this is not available, in simulated workplace operational situations that reflect workplace conditions where responding to an emergency and/or incident can be demonstrated.

Resources for assessment include:

- applicable documentation including workplace procedures, regulations and operation manuals
- relevant and appropriate materials, tools, equipment, and personal protective equipment currently used in industry including:
 - masks or respirators
 - goggles/face shields
 - gloves and appropriate clothing
 - life jacket
 - safety harness and lines.
