Release: 1

Assessment Requirements for MEACOM0019 Manage the custody, transfer and disposal of aircraft, aeronautical product and support equipment

Modification History

Release 1. Application changed. Elements and Performance Criteria changed. Foundation Skills made explicit. Assessment Requirements clarified. Supersedes and is equivalent to MEA131 Manage the custody, transfer and disposal of aircraft, aeronautical product and support equipment.

Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- manage the custody, transfer and disposal of the following under the applicable airworthiness regulatory system of:
 - one aircraft
 - one of each of the following three types of aeronautical product and support equipment:
 - special test equipment: measuring equipment, non-destructive testing (NDT) equipment, system test box, test stand, or automatic test equipment
 - ground support equipment: power cart, hydraulic rig, pneumatic rig, refuelling equipment, or towing equipment
 - hazardous and controlled material: chemicals classified as hazardous; items, such as Halon fire-extinguishers, which require an Environmental Protection Authority (EPA) licence for storage; and materials that have EPA standards for storage and use.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- key features of aircraft maintenance and aeronautical product maintenance requirements and instructions relating to the work described in the performance evidence
- environmental protection requirements relating to the custody, transfer and disposal of aircraft, aeronautical product and support equipment described in the performance evidence
- key features of test equipment calibration requirements
- regulatory requirements relating to the custody, transfer and disposal of aircraft, aeronautical product, and support equipment (including those relating to environmental protection) and other requirements specified in:
 - aviation maintenance organisation expositions
 - continuing airworthiness management organisation expositions

- policy manuals
- procedures manuals
- maintenance management plans
- standing instructions
- regulatory requirements and organisational policies and procedures relating to the custody, transfer and disposal of the aircraft, aeronautical product and support equipment described in the performance evidence, including those relating to:
 - maintaining, retaining and storing maintenance records and documentation
 - maintaining and storing aircraft and aeronautical product
 - transferring aircraft, aeronautical product and support equipment between organisations
 - transferring maintenance records and documentation between organisations
 - classifying aircraft, items of aeronautical product and support equipment for disposal
 - compiling disposal documentation.

Assessment Conditions

The following conditions of assessment represent the requirements of the regulators (DASA and CASA) and maintenance stakeholders and must be rigorously observed.

Skills must have been demonstrated under routine supervision in the workplace or in a simulated environment that reflects workplace conditions and contingencies encountered in managing the custody, transfer and disposal of aircraft, aeronautical product and product support, or a combination of on- and off-the-job assessment. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including tools, equipment, and materials required to demonstrate the performance evidence above.

Evidence of tasks demonstrating competency must be recorded in a log of industrial experience and achievement.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.
